SOUL SURGE

Soul Surging uses the substence of the soul, the Essence. After spending it, to refill it all, you must take a long rest. A short rest will replenish only half of your capacity. Eating and sleeping takes importance in that matter. Essence Proficiency is the number of your natural maximum essence. And if you run out of essence, you collapse. If, somehow, you go into negative, you get d10+2 draining damage for each negative essence.

BENCE: soulsurge ü bir attributea attuneluyorsun ve onu THG, INT, CHR gibi statlarla da atabiliyorsun. Skill muhtemelen her zaman FOCUS olacak ancak temel stat değişkenlik gösterebilir. (amk WP + Focus sadece ESNC yükseltiyosa ilerleme nasıl olcak o zaman)

HOT TAKE: Focus u esans arttırma yanından ayır. Sadece WP arttırsın. Sonra da tüm magic sistemlerinin eğrisi düzeliyor bence. Çünkü şu an 10k xp ile falan rahat 10 esans karakter açıp OMEGA MAGE abilitiler atabiliyosun
